

Enterasys University Program

Technology Bundles for Achieving IT Certifications

Providing cutting edge networking technology to colleges and universities at special pricing

Specialist to Architect level technical certification achievement capabilities

Technical hands-on reinforcement of Enterasys capabilities and solutions

Program Overview

It is no longer a question if you are connected, but how many ways you are connected. In today's fast changing IT world, if you are not keeping pace with advancements in technology, you will be left behind. The Enterasys University Program is here to help students achieve that "real-world" learning required to be competitive in today's IT world.

Enterasys University teaches students, through a combination of lecture and reinforced hands-on labs, how to configure and effectively manage a network environment. With studies focused on wired and wireless technologies, network management and security, students will be working with actual equipment in a robust lab environment to drive home the technology lecture concepts. Within each course of study, students will learn troubleshooting skills, resulting in technical problem solving capabilities for different technology situations. Upon the conclusion of each course, students will have gained the working knowledge to attempt the Enterasys certification examinations.

Technical Certifications

Our networking certification program has everything students need to develop skills maximizing the performance of the network to better meet the needs of any business. Students will learn the skills to successfully configure and manage Enterasys products in any enterprise environment. We also offer a number of certification levels, so students can choose the correct amount of training to achieve their career goals:

- **Specialist** – Upon successful completion of each Specialist level course exam, students will achieve the certification title of **Specialist (Enterasys Certified Specialist – ECS)**.
- **Expert** – Students can achieve the certification title of **Expert (Enterasys Certified Expert - ECE)** in the following disciplines: Networking, Wireless technologies, network Security, and Security Information Management.
- **Architect** – The certification level of **Architect (Enterasys Certified Architect – ECA)** can be achieved in the areas of Networking or Security.

Benefits

Associated Certifications

- ECA-Networking
- ECE-Networking Security
- ECE-Networking
- ECS-NAC
- ECS-Policy
- ECS-Switching NMS
- ECS-Routing
- ECS-Wireless

Collegiate Alignment

- Empowering post-secondary education facilities with capabilities to bring real-world training into the classroom
- Faculty access to Enterasys Instructor team and technology subject matter experts
- Enablement and certification of faculty team on Enterasys technologies and solutions
- Certification of location as a hosting site for both traditional classroom and virtual classroom events, delivered by the Enterasys instructor team

Tiered Programs

- Tiered programs designed for flexibility and scalability to meet today's networking needs
- Clear learning path for both students and studying professionals

**There is nothing more important
than our customers.**

Continuing the Learning Experience

Education is a journey to something great in you. Upon conclusion of the classes, we encourage students to continue exploring their interests in Enterasys technology. Students are able to take courses offered at not only the local Enterasys University, but they can also attend classes at Enterasys or any of our certified training partners to further their education. The Enterasys team is always looking for new, Enterasys-knowledgeable people to join our collective teams.

Technology Bundles

	Course Delivery Capabilities	Part Number	Pricing
Tier I University (Entry-level)	<ul style="list-style-type: none">• Networking Fundamentals• Switching• NMS• Routing• Wireless• Policy	TR-EU-1	\$ 24,000
Tier II University (Mid-level)	<ul style="list-style-type: none">• Tier I University courses• Network Access Control (NAC)	TR-EU-2	\$ 43,000
Tier III University (Enterprise-level)	<ul style="list-style-type: none">• Tier II University courses• IPv6 Networking• Advanced Routing• ECA Networking Hands-on lab	TR-EU-3	\$ 116,000

Note: Each bundle supports up to 10 students (2 students per lab configuration)

Testimonials

"Enterasys worked with my team on a customized solution that supports our unique campus structure, while offering high-quality training that would have been cost-prohibitive with other vendors. The Enterasys training has set the quality benchmark by which all our other vendors are now measured."

Kent Keyser, Director of IT
San Diego Community College District

"The quality of training has been outstanding – Enterasys worked side-by-side with our team to transfer knowledge and demonstrate thought leadership without arrogance to ensure we could operate and maintain the system ourselves."

Pritchard Monciffe, CIO
Langston University
