

Enterasys Professional Services: Network Assessment

Maximize Performance & Cost-Effectively Meet Business Needs

Discover the added insight that only a quality network assessment can provide. Enterasys Network Assessment Services lets customers leverage our comprehensive experience in optimizing, enabling, and securing networks in combination with industry-proven best practices – allowing network performance to be maximized while driving down expenses.

Enterasys utilizes a series of tests including both physical and logical network discovery and mapping, traffic testing, internal security analysis, and network modeling to provide a set of comprehensive network documentation. By leveraging this documentation, you are armed with the information you need to determine what network adjustments need to be made to maximize performance and more cost-effectively meet business needs.

Complete Network Assessment

Let the experts at Enterasys take the guesswork out of your network. By providing you with a thorough, customizable network assessment you will be given the peace of mind you need to focus on what matters most to you – your business. The Enterasys Network Assessment includes:

- Physical and logical network discovery and mapping
- Traffic studies and profiles
 - Application/service processes
 - Application/service bandwidth
 - Application/service usage
- Internal security analysis
- Network models

Benefits

Network Assessment Deliverables:

At the conclusion of the network assessment, Enterasys provides a confidential report that includes:

- Executive summary of the findings
- Technical detailed report of the findings
- Synopsis of possible upgrade and remediation scenarios
- Maintenance and disaster recovery recommendations
- Network management and operations summary
- Technical implementation plans
- Technical acceptance plans
- Other client-specific topics for review reconciliation
